

TechKleen FT161 Alkaline Parts Cleaner

DESCRIPTION:

TechKleen 161 is a heavy-duty liquid cleaner which is effective in both spray and agitated immersion applications. It is intended for removing difficult soils such as drawing compounds, heavy oils and greases from ferrous and non-ferrous metals.

As a silicated alkaline cleaner, when paired with the TechKleen FT1000, the **TechKleen FT161** provides excellent corrosion protection. In addition, **TechKleen 161** rejects the oils it removes. The oils can be easily skimmed away to provide a long bath life.
